## INTENT

To provide guidance on the usage of the Dynamic Speed Display (DSD) Signs on roads that are under the jurisdiction of the Washtenaw County Road Commission.

## PURPOSE

The Michigan Manual of Uniform Traffic Control Devices (MMUTCD) Section 2A.07 allows for the usage of the DSD to measure and display individual speeds at a specific location. These signs are commonly referred to as “speed display signs,” “driver feedback signs” or “your speed is” signs. The signs are activated by radar to detect and display individual vehicle speeds to the vehicle driver. The expectation is that the driver will compare his speed with the legal posted speed and adjust accordingly. These sign installations may be portable installations that are installed on a temporary basis or may be permanent installations attached to new or existing signing.

This policy shall permit DSD signs to be installed via WCRC permit. A permit application for the installation and usage of the DSD sign on roads under the jurisdiction of the Washtenaw County Road Commission shall follow the requirements and process outlined in the DSD Sign Procedure. All costs associated with such requests are to be borne by the applicant.

The DSD Sign Procedure provides guidance on the usage of these signs on Primary, Local and Local Subdivision roadways.
